

GroupNexus®

# GroupNexus NHS Parking Manifesto

At GroupNexus we're revolutionising the provision of parking services for the NHS.

With over 30 years of experience, we understand the nuanced requirements of staff and service users, and are committed to providing innovative, cutting-edge solutions that prioritise their needs.

Our focus has been on developing smart, adaptable, future-focused products and services that meet the needs of the NHS as a whole and which are not PCN focused.

We believe that today's solutions should be more than just a new version of current systems and management techniques.

**Our innovative approach to parking services is centered around flexibility, adaptability, and collaboration with our Clients.**

We work closely with our Clients to develop our services so that they are tailored to their specific requirements, ensuring that they receive the highest standard of service.

From a highly configurable **Permit System** that supports the manifesto commitments for the provision of free parking to designated groups, to **integrated ANPR** management for the various permit groups, to our **in-car waiting room** application.

We don't want the constraints of the tender process to limit our propositions, instead, we are committed to providing holistic solutions that truly meet the needs of our Clients - today and in the future.

Our passion for innovation and our commitment to putting the needs of staff and service users first, sets us apart from other parking providers to the NHS.

We believe that our approach to parking services will revolutionise the way parking is managed within the Healthcare sector.

By working with GroupNexus, you can be assured that you will receive the highest quality service, and that your parking needs will be met with innovative, bespoke, future-focused solutions.

**Join us in revolutionising parking services for the NHS.**

Together we can ensure that staff and service users receive the highest standard of care.
